AGENCY AND LEXICAL DECOMPOSITION OF BIBLICAL HEBREW VERBS

Intuition is a basic requirement, e.g. (Van Valin 2005, 36):

- a. *The window shattered vigorously
- b. The house is shaking vigorously

A PROPOSAL OF APPLYING QUANTITATIVE METHODS

How can we decompose verbs in ancient, “dead” languages?

- Applying statistical methods to distinguish active and stative verbs
- Applying additional qualitative criteria to distinguish causative and non-causative verbs

I. CLASSIFYING ACTIVE/STATIVE VERBS: A QUANTITATIVE APPROACH

- **Applied method:** “covarying collexeme analysis” (Gries and Stefanowitsch 2004; Stefanowitsch and Gries 2005)
- **Purpose:** To compute how strongly a verb is associated to a certain adverb

Four construction types:

Verb + adverbial

Verb + any other adverbial

Any other verb + **adverbial**

Any other verb + any other adverbial

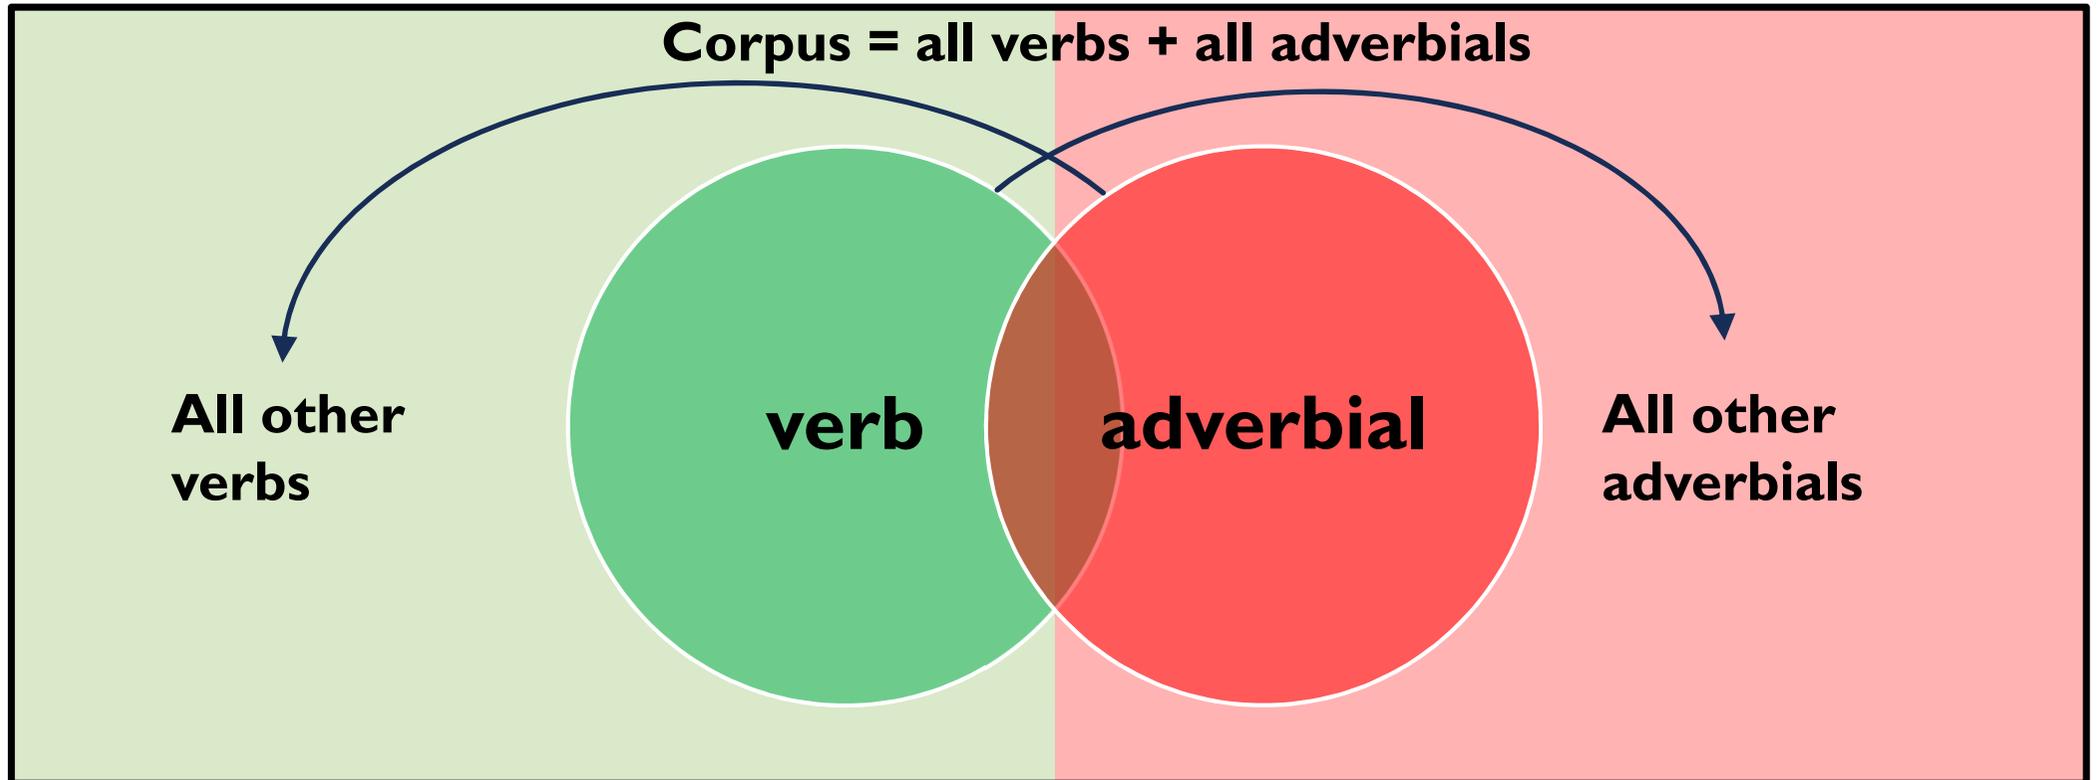

Corpus = all verbs + all adverbials

**All other
verbs**

verb

adverbial

**All other
adverbials**

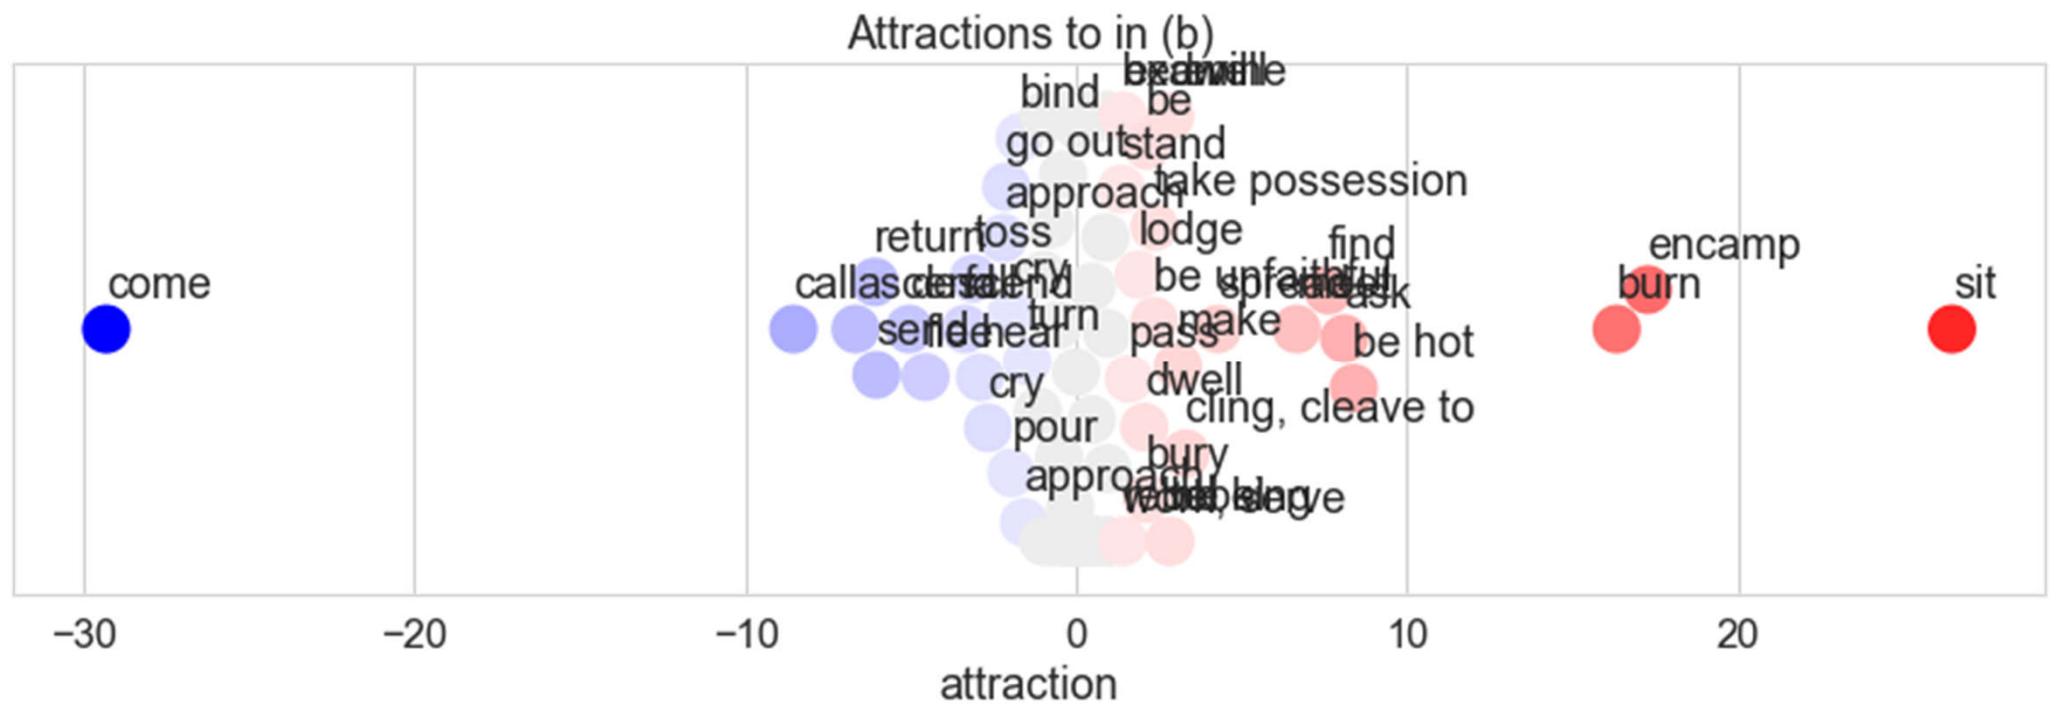

COVARYING COLLEXEME ANALYSIS

Selection of four complement forms

Complement form	Hebrew	Presumed function
Preposition "in" + substantive	ב	Locational
Prep. "on" + subs.	על	Locational
Prep "to" + subs.	אל	Directional
Subs. + morphological suffix	-ה	Directional

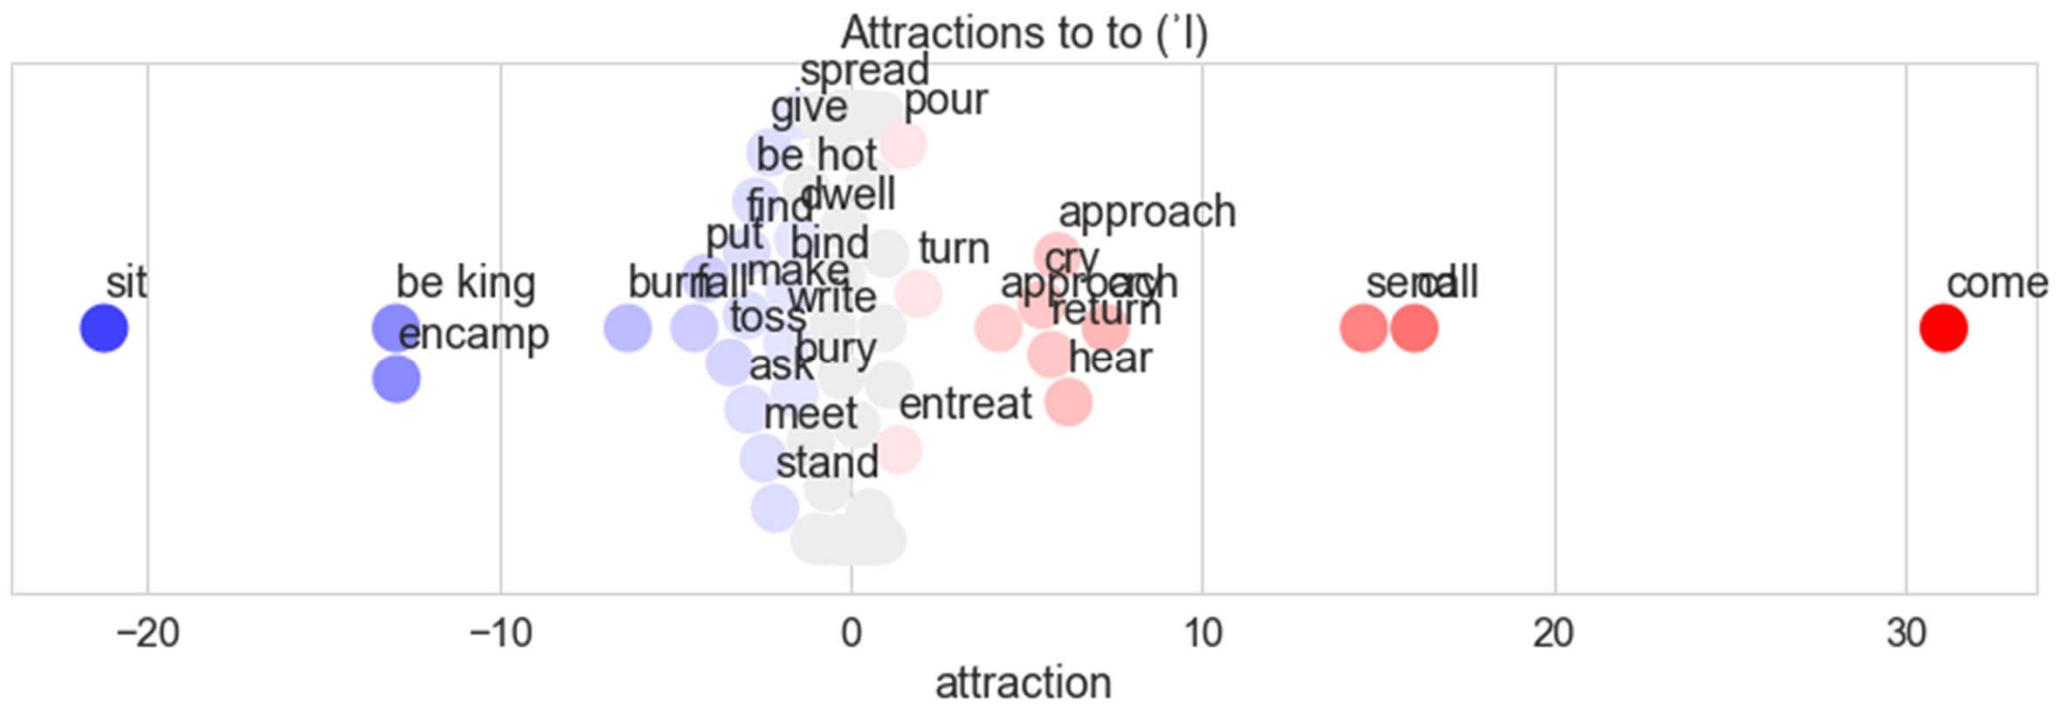

A rough disambiguation of complements: excluding substantives likely to be used as instruments (e.g. "rock", "stick" and body parts)

RESULTS

The layout of the plot is adapted from Cody Kingham (github.com/CambridgeSemiticsLab/BH_time_collocations)

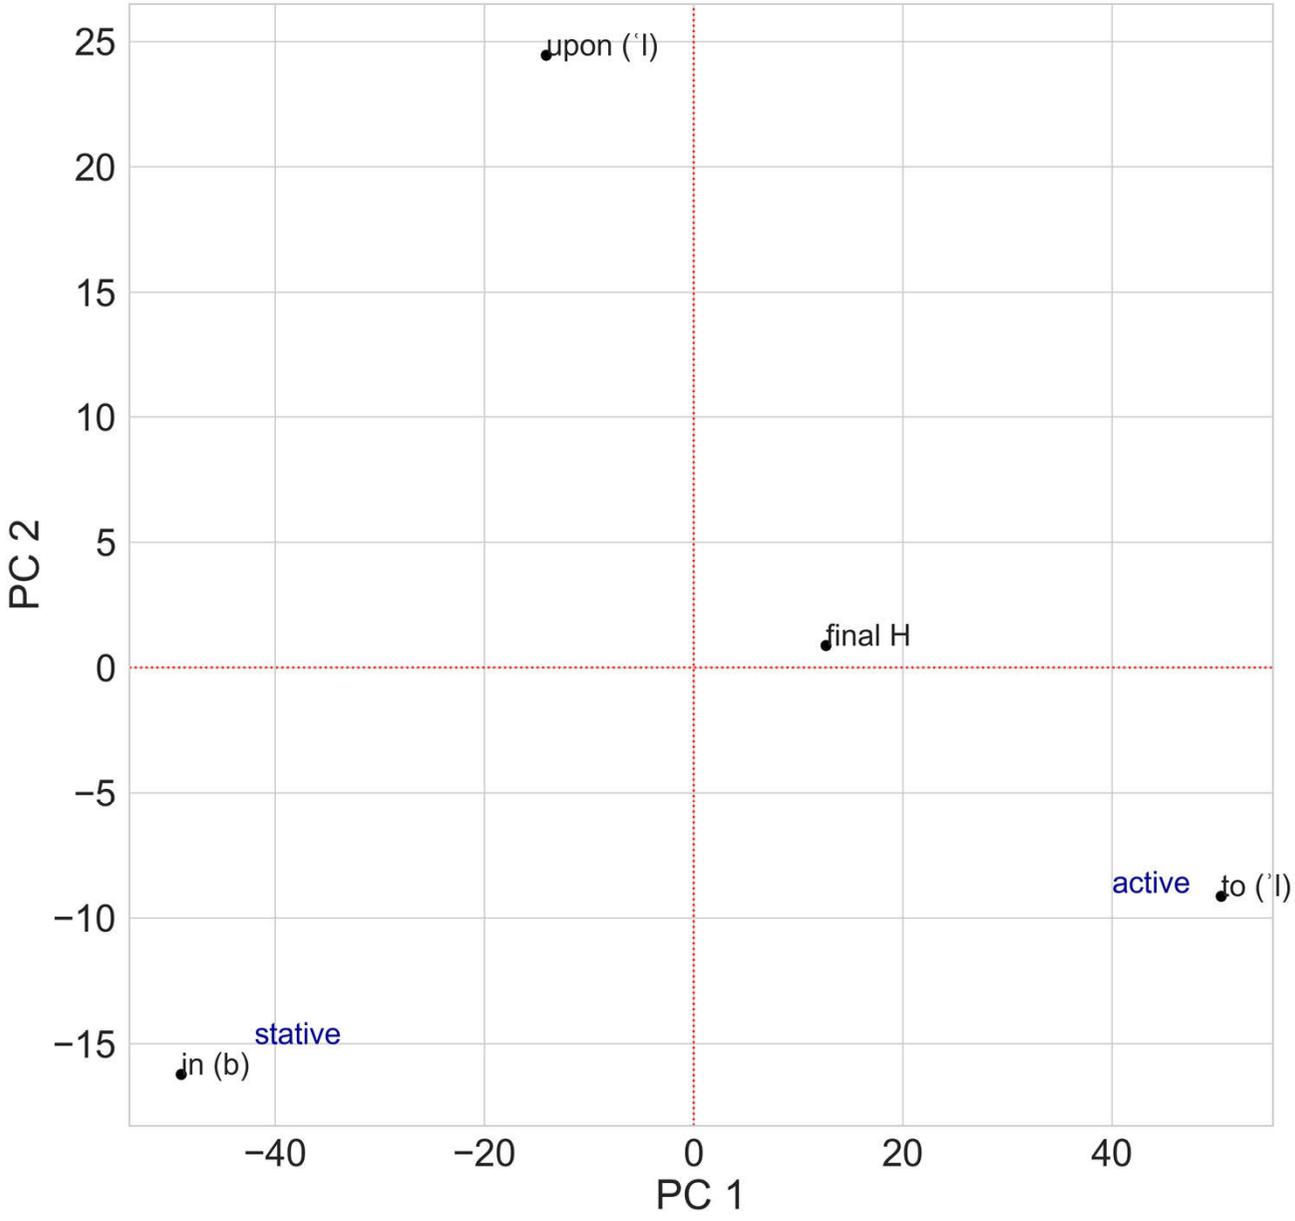

RESULTS

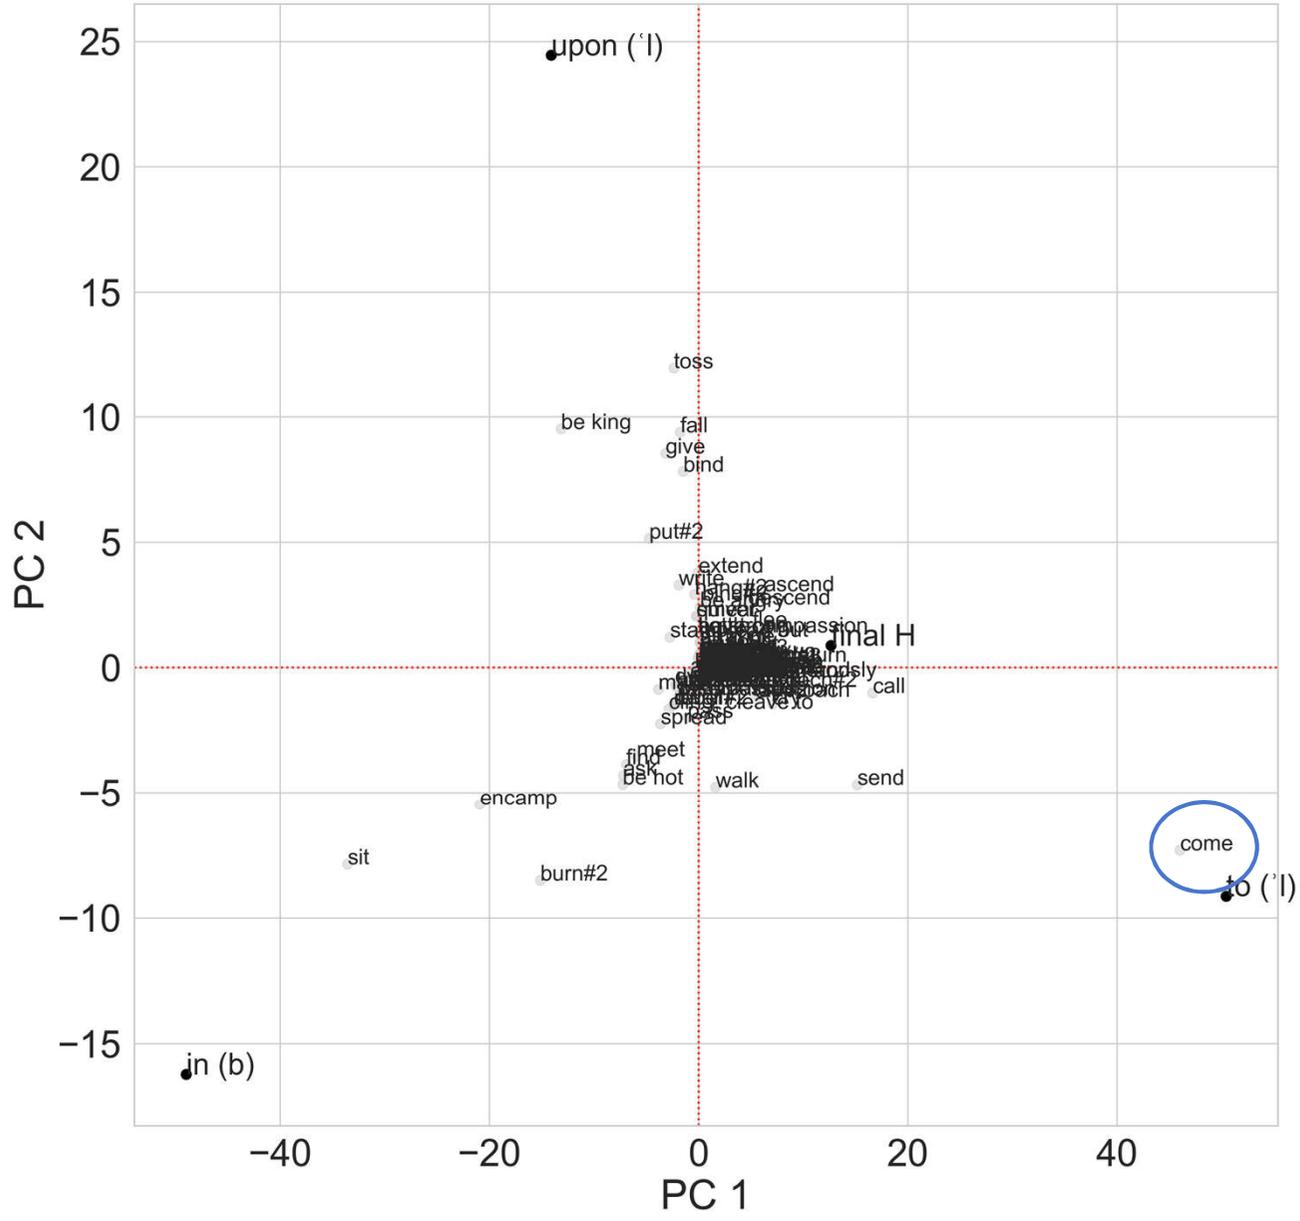

MOVING ON: PRINCIPAL COMPONENT ANALYSIS

- **Purpose:** To explore a number of independent, quantitative variables and reduce the variation caused by the variables to the lowest number of dimensions ("principal components") possible.

TRANSFER VERBS

Give, cf. Van Valin (2005, 61):

[**do'** (Pat, Ø) CAUSE [BECOME **have'** (Chris, book)]

Pat gave the book to Chris

2. BROADENING THE SCOPE: CAUSATIVES

Causative test (cf. Van Valin 2005, 38):

The dog frightens the boy → The dog **caused** to the boy **to fear**

SEMANTIC TRANSITIVITY

Hopper and Thompson (1980, 264)

“... causatives are highly Transitive constructions: they must involve at least two participants, one of which is an initiator, and the other of which is totally affected and highly individuated.”

SEMANTIC TRANSITIVITY

Prototypical transitivity, cf. Åshild Næss (2007)

	Agent	Patient
Volitionality	+	-
Instigation	+	-
Affectedness	-	+

AFFECTEDNESS AND CAUSATION

Emotion verbs

ʔiṣ ʔim -mô wə ʔāv -îw tîrā -ʔû
man mother-PRS.M.3SG CON father-PRS.M.3SG fear.IMPF-M.2PL

Everyone shall fear his father and mother (Leviticus 19:3)

RRG: **fear'** (man, his father and mother)

	Actor	Undergoer
Næss: Volitionality	+	-
Instigation	-	-
Affectedness	+	-

AFFECTEDNESS AND CAUSATION

Consumption verbs

šivʕat yām-îm mas -šôt tōʔxēl -û
seven day -M.PL bread-F.PL eat.IMPF-M.2PL

For seven days you shall eat unleavened bread (Leviticus 23:6)

RRG: do' (you, [eat' (bread)])

	Actor	Undergoer
Næss: Volitionality	+	-
Instigation	+	-
Affectedness	+	+

AFFECTEDNESS AND CAUSATION

Construction verbs

û nṭaṣ -tem kol ṣēṣ ma^ʔxāl

CON plant.PERF -M.2PL any tree eat

... and you plant any fruit tree (Leviticus 19:23)

RRG: do' (you, [plant' (any fruit tree)])

	Actor	Undergoer
Næss: Volitionality	+	-
Instigation	+	-
Affectedness	-	-

AFFECTEDNESS AND CAUSATION

Existential verbs

wə lōʔ tə -ħallēl ʔet šēm ʔelōhey-xā

CON NEG M.2SG-defile.IMPF OBJ name God -PRS.M.2SG

and you may not defile the name of your God (Leviticus 18:21)

RRG: [Do' (you, Ø)] CAUSE [BECOME **unclean'** (the name of your God)]

	Actor	Undergoer
Næss: Volitionality	+	-
Instigation	+	-
Affectedness	-	+

AFFECTEDNESS AND CAUSATION

Transfer verbs

hā ʔāreṣ ʔašer ʔanî nōtēn lā -xem
DET land REL I give.PTC to-PRS.M.2PL

the land which I am giving to you (Leviticus 25:2)

RRG: [Do' (I, Ø)] CAUSE [BECOME **have'** (you, the land)]

Næss:		Actor	Undergoer
	Volitionality	+	+
	Instigation	+	-
	Affectedness	-	+

IN CONCLUSION

- a. Covarying collexeme analysis can be successfully applied to an ancient corpus to distinguish active and stative verbs.
 - More fine-grained parameters will likely increase the accuracy (but reduce the number of relevant constructions...)
- b. Affectedness serves as a useful category to distinguish causative and non-causative verbs.
